

The All-in-One AI Cloud-Based IoT and Security Platform

The most effective system available. The only platform you need.

BluSKY Protects Your Enterprise – Regardless of Scale or Requirements

- View and manage all your facilities from a single interface utilizing the BluBØX Cloud hosted by Microsoft
- Stay connected to your security system at all times - no matter where you are - no matter what device you have
- Remotely control and manage your sites on any device with just a browser - no software or mobile apps needed
- Use BluSKY AI to see risks before they find you – automatically react to keep your people and assets safe 24/7
- Stay informed of alarms and critical events through programmable notifications delivered via email and text
- Monitor live video streams from security cameras - review video clips linked to important events
- Replace unpredictable capital expenses with a predictable operating expense and automatic product upgrades

Reduce the Complexity of Security

- Eliminate local servers and software by shifting operational workload to the BluBØX Cloud
- Reduce business risk with our high-availability services delivered from secure, redundant Microsoft data centers
- Reduce labor costs and provide improved security and convenience with our DIY architecture and features
- Minimize cost and infrastructure with integrated wireless/ POE locks and readers
- Provide better and faster support and 50% less truck rolls with comprehensive remote diagnostics
- Modify services and scale on demand to match your organization and security threats as they change
- Replace unpredictable capital expenses with a predictable operating expense and automatic product upgrades

Benefit from a Platform that Delivers the Features You Want

The combination of these nine key technologies, along with BluBØX's unique architecture, create the product's effectiveness and huge differentiation in the marketplace.

Features

- Hosted and unified access control, alarms, video and visitors
- Secure, high-availability, redundant Microsoft data centers
- Open, non-proprietary hardware and software
- Real-time control, status and response from anywhere
- Analytics and Rules-based AI
- Unlimited site, device and door capacity
- Unlimited credentials and administrators
- Distribution lists and email and text notifications
- Automatic software updates
- Customizable reporting engine
- IT-compliant hardware and communications
- Best-in-class, industry-standard security devices

Benefits

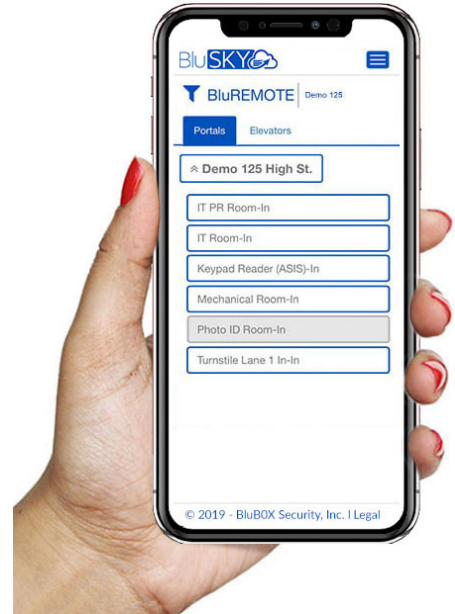

- Lower initial and on-going costs
- More effective security
- Improved situational awareness
- More protected data
- Increased flexibility, reliability and resiliency
- Equally secure and convenient
- Faster system deployment
- Enhanced policy compliance
- Freedom of Choice™ future-proof investment
- Better, faster, less expensive support
- Respond anytime using any device

Go Mobile with True Mobile Security

Manage your security on-the-go, Out-of-the-BØX. BluBØX [True Mobile Security™](#) seamlessly extends your access, alarm, video and visitor platform to any mobile device. It provides all the same functions - real-time door control, credential management, alarms, and intrusion detection, live and recorded video and visitor and vendor processing - using the same intuitive interface. No mobile apps to install or manage. Nothing new to learn. Simply, Security for the Way We Live.™

Use BluBØX True Mobile Security™:

- Take your security system with you no matter where you go
- Quickly review and respond to any security event
- View live video
- Review events with recorded video
- Monitor activity across multiple sites simultaneously
- Unlock doors remotely
- Suspend or reinstate user credentials
- Take Photo-IDs pictures with a smartphone or tablet
- Remotely verify and admit users and visitors

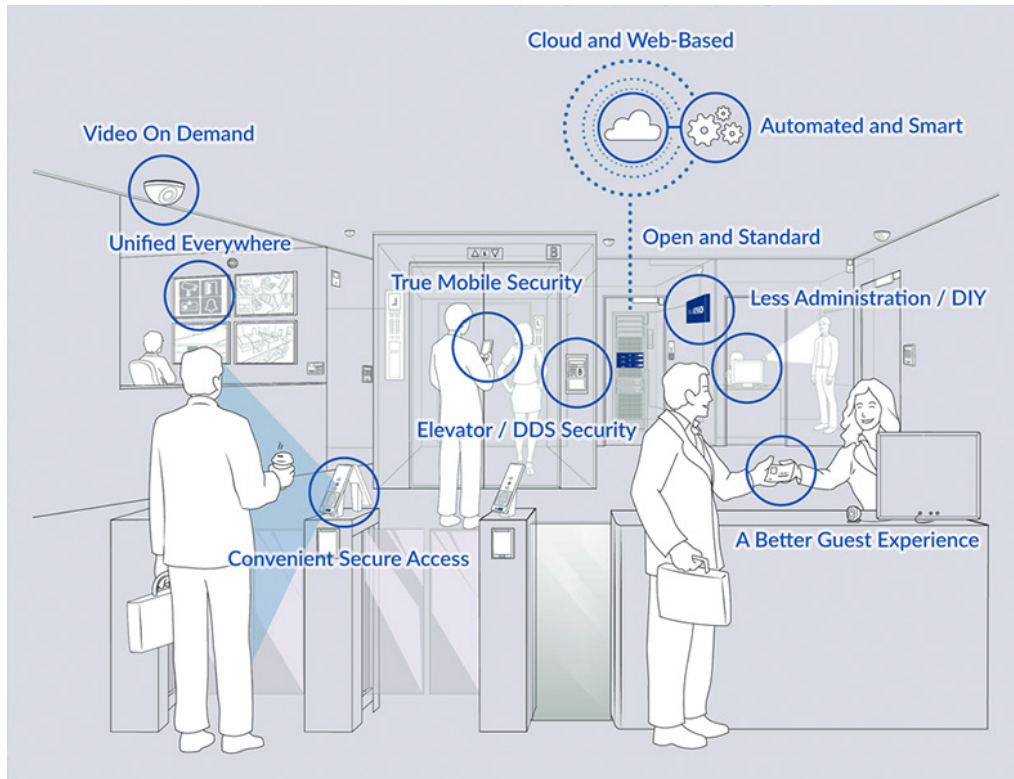

Easily Migrate Your System to BluSKY™

Upgrade to BluSKY® for roughly the same cost as an annual maintenance contract and software support agreement. The BluSKY Cloud makes the transition fast and easy with a cost that is 25% - 75% less expensive than rip-and-replace because the majority of the equipment is reused or replaced with a Cloud service. No matter what legacy system is installed, BluBØX has a migration path to get you up and running and enjoying the benefits of BluSKY. Breathe new life and capabilities into your dated system by bringing it to the BluSKY Cloud. Check out the options below:

- Mercury OEM Partner Migration
- OneFacility-Mercury Migration
- OneFacility-AMAG Migration
- Honeywell Migration
- SoftwareHouse C-Cure Migration
- CASI Picture Perfect Migration
- Proprietary System Migration

Experience Security Designed for Convenience

Cloud and Web-Based

- Lower initial and ongoing costs
- Accessible anywhere / anytime
- Less onsite equipment to maintain
- Redundant hardware and databases
- Protected by Microsoft Cloud Service

Video On Demand

- Video available from anywhere
- Local and Cloud recording
- View live video or unified events
- Less onsite equipment

True Mobile Security

- 100% system functionality on any device
- No apps required / nothing to install
- Real time control and events everywhere
- Be notified and respond from anywhere

A Better Guest Experience

- Pre-register guests from anywhere
- 80% pre-register rate
- 20 second guest processing
- Prevent undesirables with Watch lists
- Reduce guest wait time and queuing

Convenient Secure Access

- YOU are the key
- ...or your card
- ...or your smartphone
- ...or your PIN
- ...or your visitor badge

Elevator / DDS Security

- Elevator security with floor ID
- DDS integration with all manufacturers
- Unified interface with real time control
- Control by floor or car
- Rapid guest credential integration

Unified Everywhere

- Access + Alarms + Video + Visitors
- One simple database
- One simple Web user interface
- One clock for all events

Less Administration / DIY

- Distributed security administration
- One database drives multiple systems
- Self administration of common tasks
- Administer security from anywhere

Open and Standard

- Use any device, anywhere, anytime
- Non-proprietary hardware and open software
- Industry standard and future proof
- Can connect to everything

Automated and Smart

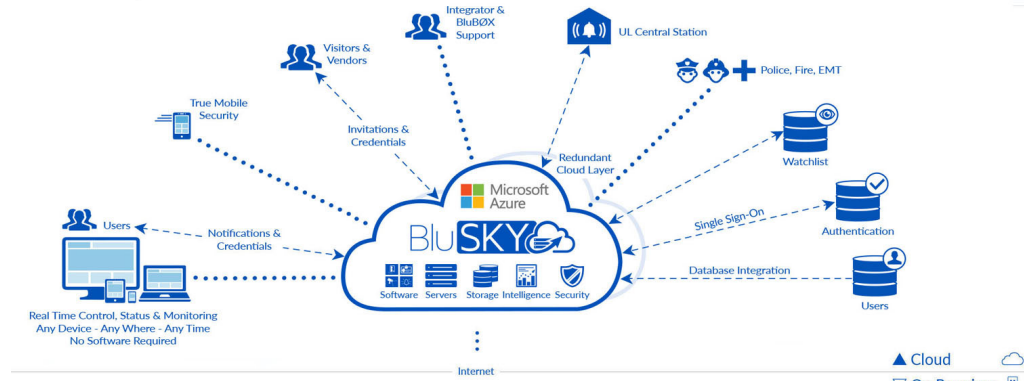

- Automatic software upgrades
- "Smart Building" integration
- Intelligent analytics / situational awareness
- Rule-based / self learning
- Automated consistency

Unlimited Capabilities

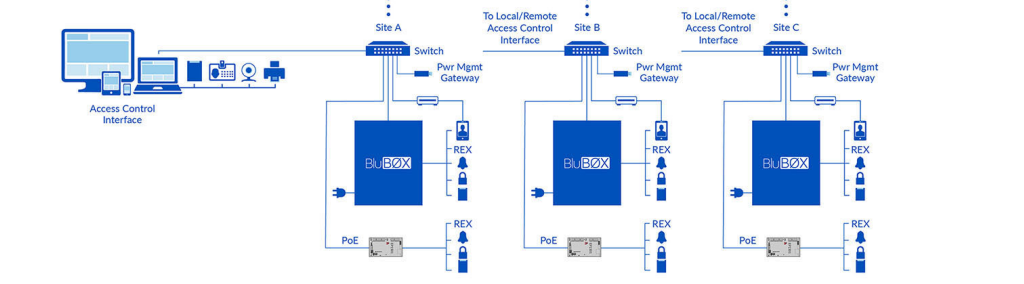

Systems, facilities and work stations	Unlimited
Active card holders	Unlimited
Simultaneous users	Unlimited
User defined fields	Unlimited
Software and firmware upgrades	Automated = 12/year
Artificial Intelligence and analytics	Unlimited
Notifications and distribution lists	Unlimited
Stored access events	Unlimited
Readers	Unlimited
Alarms and intrusion zones	Unlimited
Video cameras and recording	Unlimited
Relay elevator control	Unlimited
Destination Dispatch Elevator integration	All 6 Major Manufacturers
Visitors and vendors	Unlimited
Lockdown	By system, facility, portals
Badge design and printing	Unlimited
Anti-passback and ADA	Yes, standard configuration options
3rd Party Video integration	Yes
3rd party Alarm integration	Unlimited

Technology Partners, Integrations, and Compatible Hardware

BluBØX supports most industry-standard hardware and BluSKY can connect to everything through its open [RESTful API](#). Please visit [Technology Partners, Integrations and Compatible Hardware](#) for a complete list of supported products and integration by category. Some of the most popular integrations and technology partners are listed below:

- BluBØX Authentic Mercury Panels
 - All Mercury OEM Partner Panels
 - Casi-Mercury Replacement Panels
 - Software House-Mercury Replacement Panels
 - Assa-Abloy 485/POE/Wireless Integrated Lock Readers
 - Allegion 485/POE/Wireless Integrated Lock Readers
 - Salto Wireless Integrated Lock Readers
 - Innovonics Wireless Monitoring and Control Devices
 - Milestone Video Management System
 - *Avigilon Video Management System
 - *Salient Video Management System
 - [All Alarm Panels](#)
 - OTIS Destination Dispatch Elevators
 - Thyssen Krupp Destination Dispatch Elevators
 - KONE Destination Dispatch Elevators
 - Schindler Destination Dispatch Elevators
 - MCE Destination Dispatch Elevators
 - Mitsubishi Destination Dispatch Elevators
 - LifeSafety Power Management
 - *Axis Network Door Controller
- *under development

Browser, O/S, Device Requirements

BluSKY does not use installed software or mobile apps. - only a web browser. BluSKY supports the current version and two previous versions of all major browsers and works with all O/Ss and devices that support a standard browser.

Communication and Data Security

Authentication and Encryption	X.509 Certificates
Communication	SHA-256-bit TLS 1.1

Network Requirements

TCP/IP protocols: HTTPS (port 443)
