

## BluSKY™ Power Management

### Real-Time Power Monitoring and Management with Intelligence

Remote power monitoring and management with intelligence watches notifies and reacts to all power-related conditions. Get notified by email, text, or while online when one of the power solutions is running hot, the access control won't engage, or the security solution might somehow be compromised should a real emergency occur. Remotely access from anywhere, assess the system health, and even reboot or reset necessary components. If on-site service is necessary, it can be scheduled with the proper parts and accessories, so ideally the visit is accomplished during a single call. Here's what intelligent remote monitoring brings to the table for both integrator and end-user.

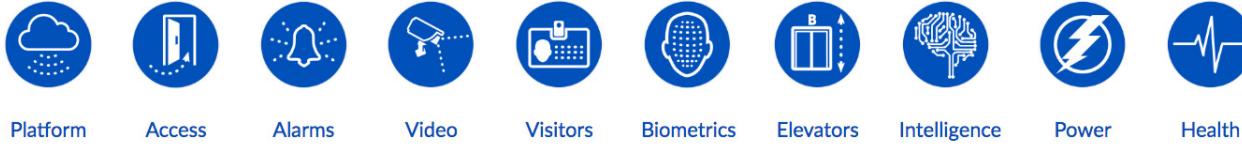

#### Key Benefits

- Know your system is properly powered
- Know your doors locks are powered
- Reduced service calls, truck rolls, and maintenance costs
- Get alerted when you switch to battery backup
- Get alerted when enclosure temperatures are out of range
- Perform remote shutdowns, diagnostics and fire tests
- Get instant notification of any power related trouble alerts
- Tie into comprehensive System Health monitoring

#### Key Features

- Remote control of system power from any device, anywhere, at any time
- Remote power cycle and shutdown
- Real-time power monitoring, statuses, and events
- Over 40 power analytics and events
- Advanced power analytics and events
- Integration with AI situation conditions and response
- On screen, Email and SMS notifications
- Multiple notifications through distribution lists

## Overview

## Power Module

### Power Module List

Number	Name	Deleted	Power Controller	Power Module Type	Date Inserted	Inserted By	Date Updated	Updated By	Date Deleted	Deleted By
1	FP075		Demo 127 High St LSP Controller	FP075 Power Supply	7/16/2016 EDT 2:19 PM	User, System BluBox, Company				
1	M8		Demo 127 High St LSP Controller	M8 Module	7/16/2016 EDT 2:19 PM	User, System BluBox, Company				
1	FP075		Demo 125 High St LSP Controller	FP075 Power Supply	7/11/2016 EDT 8:18 AM	User, System BluBox, Company				
1	M8		Demo 125 High St LSP Controller	M8 Module	7/11/2016 EDT 8:18 AM	User, System BluBox, Company

## Architecture Diagram

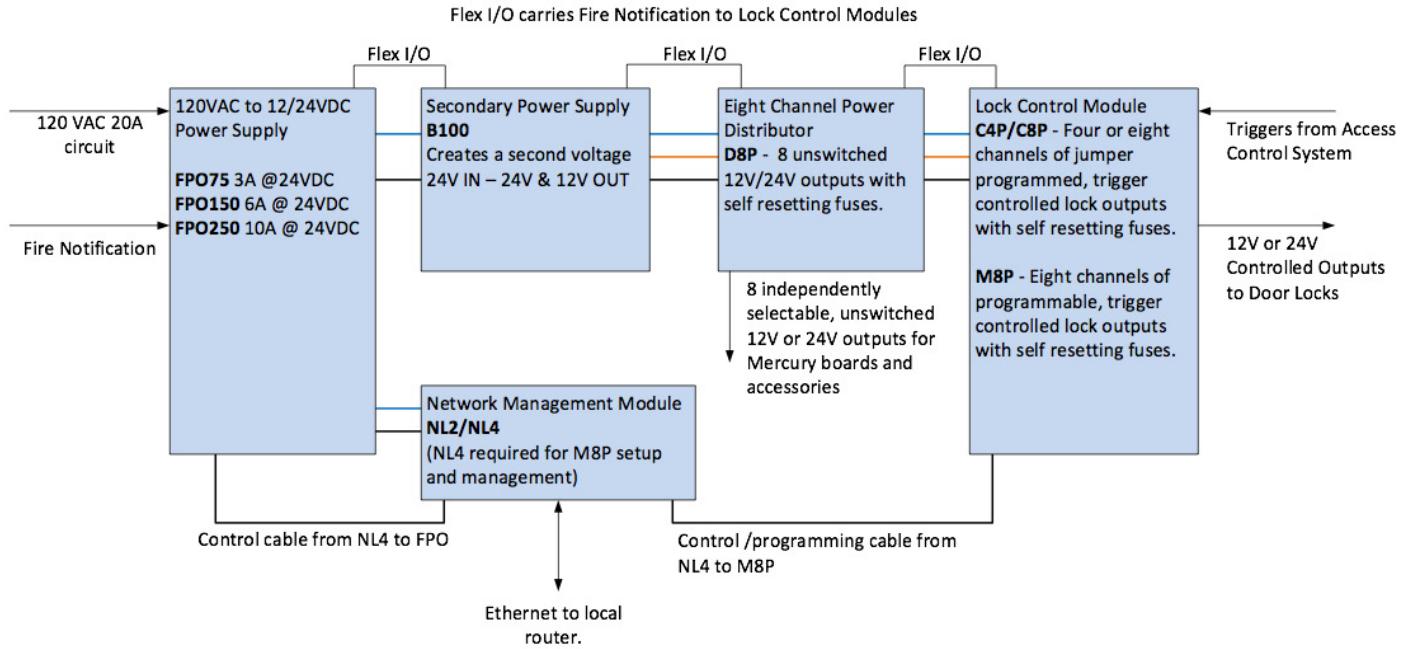

Diagram 1: Power Management Schematic ([https://knowledge.blub0x.com/Support/Hardware\\_Setup/Life\\_Safety\\_Power\\_Component\\_Interconnect](https://knowledge.blub0x.com/Support/Hardware_Setup/Life_Safety_Power_Component_Interconnect))

Control and monitor power to:

- Access Control and Alarm
- Enclosures
- Fire System
- Door Locks
- Elevator Destination Dispatch Servers
- Video and Analytic Servers
- Cameras
- Turnstiles

## Analytics and Events

All local power management components communicate their status and take their commands from the NL4/NL2. Power information is sent to BluSKY and analyzed in real time. More than 40 power conditions are analyzed and produce system events when conditions persist. Events are analyzed by an Intelligence engine and actions are taken automatically based upon the conditions.

- Power State Change to AC /Battery
- Battery Running Low
- Battery Needs Check/Replacement
- Power Supply Voltages Exceeded or Limited
- Power Supply Currents Exceeded or Limited
- Temperature Above or Below Limits
- Power Limited
- Power Not Ready
- Control Input Status Change to Active/Inactive
- Fire Relay Status Change to Active/Inactive
- Zone Status Change
- Communication Errors
- Data Not Being Read

## Hardware

BluBØX Part #	Item	Description	MSRP Unit Price
460-0500	Power Management Gateway	Compute stick and support hardware that supports communication between LSP NL2 or NL4 and BluSKY Power Diagnostics	\$315

**Reference:** The VPN / Remote Management Gateway and Power Management are required for solutions that include BluBØX Video Management Integration, Destination Dispatch Elevators or Person Readers.
